RESEARCH INTERESTS

Systems security: memory-safe systems languages, side-channel analysis, and hardware-assisted isolation. Applied work on confidential computing in multi-tenant clouds.

APPOINTMENTS

2021 - present:	Assistant Professor, University of Colorado Boulder
2018 - 2021:	Research Scientist, Kestrel Labs (Seattle)

EDUCATION

Ph.D. 2018:	Computer Science, ETH Zurich
M.Sc. 2014:	Computer Science, University of Tsukuba

SELECTED PUBLICATIONS

-
1. "Partitioned Speculation: Practical Spectre Containment for Serverless Runtimes." ACM CCS 2023.
<https://doi.org/10.1145/3576915.3616582>
 2. "WardCell: Object-Granular Memory Isolation on Off-the-Shelf ARM." IEEE S&P 2024.
<https://doi.org/10.1109/SP54263.2024.00112>
 3. "A Measurement Study of Enclave Attestation Failures in Production." USENIX Security 2025, to appear.

FUNDING

NSF CAREER Award, 2022-2027, \$110,000/yr (PI). Industry research gift, Lightship Security, 2024, \$60,000 (PI).

INVITED TALKS (RECENT)

"Memory Isolation Without New Silicon" · Real World Crypto industry day, November 14, 2024.
"Confidential Computing, Honestly" · MIT CSAIL security seminar, March 2025.

TEACHING

CSCI 6268 (Computer Security, grad), CSCI 3753 (Operating Systems). Median course rating 4.6/5 across six offerings.

SERVICE

PC member: IEEE S&P 2025, USENIX Security 2024-25, CCS 2024. Departmental graduate admissions committee (2023-).
